### MEMORANDUM

**TO:** Bruce Walden, Chief Administrative Officer

FROM: William R. Gray, Director of Public Works

**Doug Miller, Projects Coordinator** 

**DATE:** April 28, 2004

**RE: 2004 Capital Improvement Plan Update** 

## **BRIEF DESCRIPTION OF THE ITEM**

The Capital Improvement Plan (CIP) is updated annually per Section 3 of Resolution No. 8788-R14 (copy attached). This resolution also outlines various funding policies for projects. Base information (ten-year project list, cash flow projections, cost estimates, new projects, etc.) has been updated and is attached. Also included on page 27 is a map showing planned 2004 construction projects. Base maps were also updated. Many of the maps have been enhanced especially in relation to showing work planned in the next ten years. The brick sidewalk map, Figure M, has been changed based on the map referred to by ordinance and to show work completed to date and projected in the next two years. The Bike Path System map has been added as Figure R and shows projects projected in the next ten years.

In the ten-year project lists (pages 1-20 attached), projections for the 2013-14 fiscal year have been added. The left-hand column on the project list notes if a project has been completed (COMP), is under contract (CONT), has been added to the list this year (NEW) or what year it was projected for construction in last year's ten-year list (2005). The third column shows the calendar year construction is anticipated as of this update. Cost estimates for projects to be constructed are entered as applicable in the next eight columns. Miscellaneous expenditures are listed in the next column. The total annual cost for each listing is also shown. The last five columns note the various revenue sources and amounts for each listing. Cash flow projections through the year 2013-14 for the Sewer Benefit Tax (SBT), Motor Fuel Tax (MFT), Capital Replacement and Improvement (CR&I), related Community Development Block Grant (CDBG), Tax Increment Financing Districts (TIF), and Motor Vehicle Parking System (MVPS) funds are shown on pages 21 - 26. Updated maps are included on pages 27 - 61.

The cash flow and project list correlate exactly to each other as far as annual revenue and expenditures go. Each expenditure subtotal shown for the Sewer Benefit Tax, Motor Fuel Tax, Capital Replacement and Improvement and Community Development Block Grant funds in the cash flow should be exactly the same as the Fund's Revenue Sources' subtotal for each fiscal year's project list. TIF funding is not subtotaled, but the total of the funds shown in each fiscal year's project list is the same as the amounts shown in the four TIF funds' cash flows in that fiscal year. The project list and the cash flow for FY '02 and FY'03 are included to provide reference information.

The general scope and methodology used to determine projects is the same as in previous years. The 2004 list is based on current conditions, policies, programs, priorities, fund balances, revenue projections, general cost estimates, and staff availability. A change in one or more of these factors may alter these projections. Some projects may also be programmed based on Council directives, development agreements, or other special considerations.

#### 2004 TEN-YEAR PROJECT LIST

The following is a discussion of the significant projects and changes in the 2004 project list. In addition to the comments below, many street resurfacing, reconstruction, or improvements cost estimates have been increased by 10% to account for inflation, anticipated asphalt price increases, and new sidewalk ramp requirements in the ADA act. It should also be noted that most projects shown assume that engineering will be performed in-house. Projects that are projected to use outside engineering services are noted in the project description. Outside engineering services would add approximately 20% to most projects. Also, some projects in the later years may have moved up or back one or two years due to cash flow or other coordination considerations. Major changes and comments are as follows:

- The major 2004 construction projects are shown on the 2004 Construction Map, page 27. Resurfacing of Vine Street from University Avenue to California Avenue and from Iowa Street (extended) to Florida Avenue, Cottage Grove Avenue from Main Street to south of Oregon Street and other streets; reconstruction of Goodwin Avenue from Dublin Street to University Avenue; construction of the Goodwin Avenue Bike Path; University Avenue and Goodwin Avenue intersection improvements; reconstruction of Oakland Avenue from Cunningham Avenue to the east; a slurry seal/micro-paving program on various streets; storm and sanitary sewer repairs; and major brick sidewalk work are all planned for this construction season. The map also shows several developer projects such as the extension of Colorado Avenue and the South Ridge Bike Path.
- The Airport Road improvement has been moved from 2005 to 2007 construction at a total City cost of \$1.85 million. The City is obligated to construct this project per a development agreement.
- Storm sewer work on Linview Avenue north of Kettering Park Drive has been added to the Bradley/Coler storm sewer work. Part of the work is projected in 2005 and part in 2011.
- The projected City portion of the extension of Colorado Avenue to Stone Creek Boulevard has been added at \$200,000 in 2005. The cash flow assumes borrowing from the Economic Development Fund with repayment from the Sewer Benefit Tax (\$50,000) and Capital Improvement & Replacement (\$150,000) funds over ten years to fund this project.
- The Cunningham Avenue and Crystal Lake Drive traffic signal installation has been moved to 2006 from 2004.
- Lierman Avenue has been moved up from 2008 to 2005. The County will pay the initial cost with the City's two-thirds share being paid back from the MFT fund over three years.
- Traffic signals and street lighting on Lincoln Avenue south of Illinois Street and resurfacing Goodwin Avenue from Clark Street to Green Street, Green Street from Lincoln Avenue to Wright Street, and the intersection of Lincoln Avenue and Green Street have been deferred one or two years so the CATS study can be completed before any major work is done on these street sections. It is projected that the University of Illinois will participate in most of this work.

- The University Avenue and Goodwin Avenue intersection improvement initiated by the University of Illinois is listed in 2004. There are no city funds involved in the project.
- All large storm sewer project costs have been reviewed. Some project costs have been reduced to
  reflect recent sewer lining bids. Projected miscellaneous storm sewer repairs have been increased
  to \$100,000 per year to reflect recent expenditures and work identified. \$60,000 for material costs
  for replacing the East Washington Street culvert is included in 2005. This would be done as a joint
  project with Urbana Township.
- Projected parking lot work is projected at \$250,000 in 2005 and \$500,000 per year in the next three years. Figure O has been revised to show where work is projected.
- The brick sidewalk maintenance has been separated from the general pavement maintenance item. \$225,000 is proposed for 2005 with \$75,000 per year thereafter. The higher number is proposed for 2005 in order to maintain the current momentum from recent work. Bid prices also should now reflect the experience several area contractors have with the work. A cleaning/weed abatement program is also being analyzed for effectiveness and cost.
- Major concrete street repairs are now listed individually on the project list.
- A \$100,000 per year set aside has now been included in the Sewer Benefit Tax Fund projections in anticipation of needed expansion of sanitary sewers at the east, south, and north sides of the City. Costs are projected based on estimated costs identified in the <u>Urbana & Champaign Sanitary District Long Range Facility Plan</u>. The amount shown is a projected one-third local share of the estimated cost (\$1,500,000 out of a total \$4,600,000) for first phase work and borrowing the money through the IEPA loan program at 2.5% interest over 20 years. This is similar to recent agreements between the Urbana-Champaign Sanitary District and City of Champaign. Additional work will also be necessary at some future time. This addition has no substantial impact other than the comprehensive sewer study projected for 2011 has been dropped. Most recent sewer analyses have been done in-house.
- Phase 7 streetscape work is included at approximately \$250,000. Work will include bump outs at Main Street and Springfield Avenue, streetscape sidewalk work, and median work on the streets around Lincoln Square. Remaining Phase 6 work is currently underway including reconstruction of the Elm Street mini park and the MTD bus stop on Broadway Avenue on the east side of the Courthouse. Projected streetscape work on Broadway Avenue (\$600,000) has been added in 2009.
- Most of the series lighting replacement work scheduled for 2004 was completed in 2003. The balance of the series street lighting replacement in Area 4B, Lincoln Avenue from California Avenue to Delaware Avenue and the Campus Area is included in 2005 and 2006. The Campus Area has been added this year. It is projected that the University of Illinois will participate in the Campus Area project.
- The Florida Avenue Bike Path has been moved up to 2006 from 2012. Bike paths on High Cross Road from Windsor Road to north of Stone Creek Boulevard and from Florida Avenue to University Avenue are also included in 2006. Four other paths are shown in 2012. All projects assume a 50% funding by the Illinois Department of Natural Resources. The paths on High Cross Road are proposed due to the anticipated development in the area and the recent revision of Illinois Department of Transportation policy regarding bike paths on State ROW. With the change in position a major link in the City's system is now possible. There are currently eight active bike path projects in Urbana Goodwin Avenue, Lierman Avenue, Southridge, Colorado Avenue,

Stone Creek Boulevard, Florida Avenue, Windsor Road (east of Stone Creek Boulevard), and the Wal-Mart/Rails-to-Trails path. The City of Urbana's Bike Path System is a major City amenity that should soon be greatly expanded. Direct connections to all areas of the City and to major destination points, including downtown, may be accomplished within the next ten to twelve years depending on funding availability and development progress.

- Projected costs are included for extending Florida Avenue from Abercorn Street to High Cross Road in 2006 and 2007. The total projected cost for extending Florida Avenue is \$1,200,000. There is also \$200,000 included in the MFT fund for a traffic signal at the intersection with High Cross Road. The current cash flow projects street construction to be funded one-third by the City (\$400,000) and two-thirds (\$800,000) by developers/adjacent property owners. Borrowing may be necessary to fund the City portion. Repayment of any City portion would be from the CI&R (\$300,000) and SBT (\$100,000) funds over a ten-year period. This scenario is how the project is shown in the cash flow.
- The widening and traffic signal work at Philo Road and Colorado Avenue has been moved to 2006
  and increased to include construction of the south side of Colorado Avenue from Philo Road to the
  proposed Golladay Subdivision. The reconstruction of the rest of Philo Road down to Windsor
  Road is projected in 2009.
- The improvement of Windsor Road from Philo Road to High Cross Road has been moved from 2006 to 2008 due to availability of federal funds.
- The Race Street reconstruction project is now projected entirely from TIF 2 funds. The project includes reconstruction and widening of Race Street from Griggs Street to Park Street plus bridge replacement. The project also includes a bike path being constructed to the west along the railroad ROW.
- The Lincoln Avenue and Church Street traffic signal and related street work has been moved from 2006 to 2007.
- The improvement of Mathews Avenue From Church Street to south of Eads Street has been moved form 2007 to 2008.
- The reconstruction of Green Street from Lincoln Avenue to Race Street has been moved from 2009 to 2012 and Green Street from Vine Street to Cottage Grove Avenue from 2010 to 2011.
- Olympian Drive has been moved back one year to 2013.
- Reconstruction of Washington Street from west of MacArthur Drive to High Cross Road has been extended to the west to Dodson Drive and moved from 2013 to 2014. The total cost has been increased to \$1,400,000. This project may need to be addressed sooner depending on future traffic volumes. It is assumed that this project or the south Philo Road project will become a high priority at some point. If both are needed in the next five years, borrowing or re-prioritization of other projects or a combination of the two may be necessary to fund both projects.
- The balance of the North Broadway Area storm sewers has been deferred until 2014 from 2008. This is due to several factors including cash flow and project priorities. The portion completed in 2002 addressed complaints about basement flooding along Division Street and intersection flooding at Oakland Avenue and Division Street. The balance of this project is related to surface

drainage deficiencies, some of which are in the County, and can be postponed until a coordinated project can be developed.

- Projected curb and gutter work on Clark Street, Indiana Avenue, and Michigan Avenue has been added in 2014. Other streets may be identified as the barrier curb and gutter inventory is updated. Figure F now shows all major curb and gutter work projected in the next ten years.
- The Iowa Area and Ohio Street sewers have been completed under the sanitary sewer Inflow & Infiltration program.
- The extension of Smith Road from Main Street to Washington Street has been dropped due to the Urbana Park District's development plan for Weaver Park.

#### DESIRABLE PROJECTS NOT SCHEDULED

There are many other major street projects not included in the cash flows. There are many oil and chip streets without curb and gutter that are not included for improvement in the next ten years plus other multi-million dollar projects as listed below. Some of these projects may increase in priority in the future and, if funding levels are maintained as projected, necessitate deferral of some projects currently included in the 2004 ten-year project list.

•	Philo Road from Windsor Road to Southridge V	\$1,500,000
•	Installation of street lighting on unlit arterial/collector streets (University Avenue, High Cross Road, & Florida Avenue	\$1,100,000
•	Intersection street lighting – approximately 200 intersections	\$1,000,000+
•	Lincoln Avenue extension to Olympian Drive	\$3,000,000
•	Airport Road from Willow Road to Lincoln Avenue	\$3,700,000
•	Additional interceptor work north and east -local one-third share	\$3,000,000 +
•	Interchange at High Cross Road and I-74	?
•	Boundary area storm sewers	?

### **CASH FLOWS**

Revenues have been revised to reflect inflation increases except the Motor Fuel Tax Fund which reflects the increased revenue under the Illinois First Program. Reimbursements for some project expenditures from other agencies are still key to maintaining this overall project level. The cash flow assumes the State (Department of Natural Resources) funds half of most future bike paths and recapturing Goodwin Avenue Detention Basin costs (\$254,000 between 2008 and 2013) from adjacent property owners. Also, funding of several major projects is split over more than one fiscal year because of cash flow. Construction cost payments may be ahead of revenue receipts in some cases necessitating internal fund borrowing until revenue is received. This is particularly true in the later years of the project list.

#### **BACKGROUND/FACTS**

The purpose, goals and objective of the Capital Improvement Plan remain the same as outlined in the first plan, i.e. consistent, coordinated and realistic long-range planning is essential for maintaining existing facilities and continuing to provide a high-level of infrastructure in support of the local economy and environment. The Capital Improvement Plan provides a comprehensive infrastructure database so that better decisions can be made to efficiently and effectively use construction and maintenance dollars.

Each proposed project has been reviewed and evaluated regarding all other potential infrastructure needs on that street section with sanitary sewers and street maintenance being lead projects in many cases. This comprehensive analysis is used to coordinate projects in an efficient, cost effective manner and to minimize construction inconveniences to residents in the project area.

### **OPTIONS AND THEIR CONSEQUENCES**

The Capital Improvement Plan articulates long-range aspirations of the City. This is a product of interaction between the City's goals, objectives and resources. Approval of the revised Capital Improvement Plan is important for the vitality of the City of Urbana and economic efficiency is realized and construction inconveniences are minimized through capital improvement planning. The Capital Improvement Plan allocates projected financial resources to carry out capital improvements based on overall priorities and priorities within specific infrastructure elements.

### **RECOMMENDATIONS**

It is recommended that a resolution be adopted approving the revised Capital Improvement Plan for this year. A draft of the resolution is attached. This information will be utilized in the budgeting process for capital improvements through the special fund budget sections.

Prepared by: Douglas H Miller (signed 4/28/04)

#### RESOLUTION NO. 8788-R14

### A RESOLUTION APPROVING THE CAPITAL IMPROVEMENT PLAN FOR THE CITY OF URBANA

WHEREAS, the capital infrastructure is important for the vitality of the City of Urbana and the health, safety and comfort of its citizens; and

WHEREAS, financial resources are limited and it is essential to establish priorities for capital improvements to spend monies effectively and efficiently; and

WHEREAS, economic efficiency is realized and construction inconveniences are minimized through capital improvement planning; and

WHEREAS, the support and understanding of the information concerning capital improvement planning is vital for an informed citizenry; and

WHEREAS, Resolution No. 8182-R32 requires that a Capital Improvement Plan be established for the City of Urbana; and

WHEREAS, development of a Capital Improvement Plan was identified as one of the top three priorities of the City Council at a goal-setting session in July 1986;

NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF URBAN, ILLINOIS, as follows:

- The Capital Improvement Plan for the City of Urbana, dated July, 1986, prepared by the City staff, be and the same is hereby approved by the City Council.
- 2. Option 3A as amended, along with a program to be developed for the repair and maintenance of brick streets and sidewalks shall serve as a Master Plan for coordinating and prioritizing capital improvements so identified in such Capital Improvement Plan in and for the City of Urbana and to aid review of subdivisions and developments.
  - 3. That this plan shall be updated annually to reflect new needs and project priorities.
- 4. That the following concepts are incorporated into the Capital Improvement Plan relating to methods of financing the various improvements in the plan:
- A. All City funds will be utilized to carry out street, sidewalk and lighting projects on arterial and collector streets ("City funds" as used herein shall include CIRF, MFT, FAU, CDBG, etc., and funds obtained from private sources; i.e., annexation and development agreements).

- B. All City funds will be utilized for projects involving the maintenance, reconstruction and replacement of existing streets, sidewalks and lighting systems; included are brick streets and brick sidewalks.
- C. Projects involving new or significantly upgraded residential street, sidewalk and lighting projects (except CDBG projects), will be subject to a policy to be adopted by the City Council.
- D. Sewer Benefit Tax funds will be utilized for improvements to the public sewage system, with property owners responsible for the construction cost and maintenance of service lines from the mains.
- E. All City funds will be utilized for improvements to storm sewers and detention facilities that are part of the public drainage system, with property owners responsible for the construction cost and maintenance of service lines from the mains.
- F. All City funds will be utilized for new construction and replacement of traffic signals.
- G. All projects are dependent upon the availability of funds from the respective funding source, including the Capital Improvement and Replacement Fund.
  - That implementation of the Plan shall be through normal budgeting processes or through other means acceptable to the City Council.

PASSED by the City Council this 18th day of April, 1988.

Ruth S. Brookens, (signed) Ruth S. Brookens, City Clerk

APPROVED by the Mayor this 25th day of April, 1988.

Jeffrey T. Markland, (signed Jeffrey T. Markland, Mayor

#### RESOLUTION NO. 2004-05-012R

#### A RESOLUTION APPROVING

#### THE 2004 UPDATE OF THE

#### CAPITAL IMPROVEMENT PLAN FOR

#### THE CITY OF URBANA

WHEREAS, Resolution No. 8788-R14 has established methods of financing the various improvements in the Capital Improvement Plan for the City of Urbana; and

WHEREAS, Section 3 of Resolution No. 8788-R14 required that the Capital Improvement Plan be updated annually to reflect new needs and project priorities;

NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF URBANA, ILLINOIS, as follows:

- 1. The Capital Improvement Plan for the City of Urbana, dated April 28, 2004, updated by City Staff, be and the same is hereby approved by the City Council.
- 2. That implementation of the plan shall be through the normal budgeting process or through other means acceptable to the City Council.

PASSED by the City Council this day of	, 2004.	
		Phyllis D. Clark, City Clerk
APPROVED by the Mayor this day of	, 2004.	
		Tod Satterthwaite, Mayor
