RE: **2018 Capital Improvement Plan Update**

BRIEF DESCRIPTION OF THE ITEM

The city's Capital Improvement Plan is updated annually per Section 3 of City Council Resolution No. 8788-R14 (copy attached). This resolution also outlines funding policies for various types of capital improvement and maintenance projects and directs implementation through the budget process. The original plan was adopted after several years of information gathering and discussion on various city infrastructure categories – sanitary and storm sewers, street maintenance and improvements, traffic signals, arterial and collector street lighting, residential street lighting, curb and gutter maintenance, and concrete sidewalk maintenance and construction. Information gathering was started in the early 1980's culminating in individual reports published in 1986. The reports on the various infrastructure categories listed the identified needs in each category, the estimated cost of each individual project, and the priority of that project. Additional funding possibilities were also discussed while these reports were being prepared and presented. This process resulted in four major actions. The adoption and implementation of the Sewer Benefit Tax, the allocation of a portion of a new city sales tax to the Capital Replacement and Improvement Fund, the adoption of the first comprehensive Capital Improvement Plan (CIP) in 1988, and related policies, including an annual update of the CIP, were included in the original adopting resolution. Since this time the city has also adopted a Stormwater Utility Fee in 2013 and a Local Motor Fuel Tax in 2010 to augment the funding of the CIP. Public facilities maintenance and improvements plans were included as part of the CIP programming, starting in 2017.

The 2018 CIP project list for FY18 to FY23 (pages 1-6) is attached along with updated five-year cash flow projections of revenues and project and program costs, (pages 7-17). A portion of the 2017 City of Urbana Street Ratings matrix has been included (pages 18-24). This table shows the street condition rating system used in initial street project planning stages. Updated maps, showing construction projects completed in 2017, planned in 2018, and projected for 2019, are included on pages 24, 25, and 26, respectively. Figures A through L, pages 27-38, are also included showing various city infrastructure-related information.

All projected revenues and budget expenses for the Sewer Benefit Tax (SBT), Stormwater Utility Fee (SWUF), State Motor Fuel Tax (SMFT), Local Motor Fuel Tax (LMFT), and Capital Replacement and Improvement (CR&I) funds are included in the cash flow projections. Related costs for capital projects in the Community Development Block Grant (CDBG), three Tax Increment Financing Districts (TIF), and Motor Vehicle Parking

System (MVPS) funds are also included in the cash flow projections. The annual expenditure projections in the CR&I Fund have been reorganized to subtotal different categories of expenditures in that fund. A final expenditure total and fund balance are still included at the bottom. All numbers used in the cash flow projections (revenues and expenditures) are in current (2018) dollars. Cost estimates and revenues are updated based on current information. It should be noted that most cost estimates are based on average costs per lineal foot, square yard, etc. Actual final project costs are not known until design is complete, bids are received, and construction has been completed. Circumstances unique to a particular project design may increase or decrease the projected costs.

The cash flow and project list correlate exactly to each other for annual revenues and expenditures. Each expenditure's subtotal shown for the SBT, SWUF, SMFT, LMFT and CR&I funds in the cash flow should be exactly the same as the fund's Revenue Sources' subtotal in each fiscal year's project listing. TIF, CDBG and MVPS funds are not subtotalized, but the amounts are shown for these funds in each fiscal year's project list. Miscellaneous Funds' columns are the same as the amounts shown in the TIF, CDBG and MVPS funds' fiscal year's cash flows.

The 2018 plan is based on current conditions, policies, programs, priorities, fund balances, revenue projections, general cost estimates, and staff availability. A change in one or more of these factors may alter these projections. Some projects may also be programmed based on Council directives, development agreements, or other special considerations.

REVENUES

Changes and adjustments in the revenues within the various funds that have occurred since the 2017 CIP are noted below.

- **Sewer Benefit Tax**
 - The Sewer Benefit Tax revenue is projected as \$1,435,291 in FY19 (up from \$1,401,913 in FY18).
- **Stormwater Utility Fee**
 - The Stormwater Utility Fee revenue is projected as \$ 1,559,472 in FY19 (up from \$ 1,519,667 in FY18).
- **State Motor Fuel Tax**
 - The projected revenue is shown as \$1,062,188 in FY19 (same as \$1,062,188 in FY 18). Future SMFT revenues in FY19 through FY23 are expected to decline over time as auto manufacturers phase in federal fuel efficiency standards. For example, the revenue for FY23 is expected to be \$1,020,333.
 - An annual SMFT allotment of \$26,600 for the City's designation as a high-growth community has been included in FY19 which is the last annual payment until the new census data is available.
- **Local Motor Fuel Tax Fund**
 - The projected revenue is shown as \$900,000 in FY18 (same as \$900,000 in FY 18).
 - Future projected revenues in FY19 through FY23 are expected to decline over time similarly as the State Motor Fuel Tax. For example, the revenue for FY23 is expected to be \$864,536.
 - Local gas tax history - The local gas tax ordinance of 2¢ per gallon was passed by the City Council on August 16, 2010. The gas tax was raised to 2.4¢ per gallon, effective July 1, 2011, and effective July 1, 2012, the gas tax was raised to 4¢ per gallon. The current local motor fuel tax rate is 5¢ per gallon, which went into effect on August 1, 2015. Approximately \$180,000 of local gas tax revenue is generated annually from each cent per gallon.
- **CR&I Fund**
 - The CR&I fund transfers from the General Fund were \$716,135 for FY18. The CR&I fund transfers have been shown as \$740,412 in FY19. Future general fund transfers to the CR&I fund

- in FY19 through FY23 are projected to be \$740,412 to \$833,340 per year (up from \$716,135 in FY18).
- The CR&I fund also includes a revenue of \$100,000 for the sale of the Tri-Star Property located at Washington Street and Philo Road
- The remaining \$1,219,006 of the \$1,305,902 in Illinois Economic Development Program revenue for the reconstruction of Airport Road from Cunningham Avenue to Willow Road is shown in FY18.

EXPENDITURES

It is emphasized that project costs continue to fluctuate with material prices, in particular oil and metals, which directly affect costs for asphalt, fuel, street light wire, street light pole, traffic signal materials, etc. As cited in recent CIPs, increases in construction-related expenses have far surpassed overall inflation rates in recent years.

The 2018 CIP also includes increased costs for some recurring projects, new projects, and new programs. In the CR&I fund projections, street maintenance allotments have risen due to the considerable new maintenance work needs identified and cost increases. Funds have been allocated in the LMFT fund for Pavement Preservation for treatments such as Micro-Surfacing, Oil & Chip and Surface Seals to prolong the life of some of those pavement structures that are not to the point of needing major resurfacing or reconstruction.

Other funding demands have been added to the CR&I fund in past years. The variations of these amounts have had a significant cumulative effect. Some examples of additional funding demands are bicycle and pedestrian improvements and the Americans with Disabilities Act (ADA) compliance requirements.

In addition to these increases there are other potential major future project needs discussed below that are **not** included in the 2018 CIP cash flow projections. Some of these include the extension of east Florida Avenue to High Cross Road, Boneyard Creek Improvement Projects, the reconstruction of east Washington Street and the resurfacing of arterial and collector streets rated in poor and fair condition. Also, while not included in these cash flows, future additional public works building construction or remodeling, new or replacement parking lighting, and sustainability implementation may impact available funding.

The implementation of the Stormwater Utility Fee generates revenue that provides funds for the compliance with the stormwater regulations, erosion control regulations and for those storm sewer related expenditures that were previously funded by the CR&I Fund.

It is estimated there are approximately three hundred fifty-one (351) lane miles of pavement. One lane mile is twelve feet wide and one mile long. About 48% of the streets in the city are classified as local (residential), 32% as collectors and the remaining 20% as arterials. The majority of the city streets are asphalt (49.1%) with the remaining streets being concrete (43.6%), other (5.4%) and brick (1.9%). The “other” classification includes the weaker pavement structure of oil and chip on a thin aggregate base. All known preventive maintenance procedures and operations and pavement preservation processes are constantly being researched and reviewed so funds can be allocated for implementation as efficiently and effectively on existing street pavements.

Following are those changes and/or additions to the expenditures projected for the various funds:

- **Sewer Benefit Tax (\$1,383,721 in FY19)**
 - Funds continue to be reserved annually to finance the cost of future sewer interceptor construction needed for development purposes. A reserve of \$1,100,000 is projected by FY23.
 - The majority of expenses are for operation and maintenance activities (\$826,162 in FY19) or rehabilitation and reconstruction expenses (\$400,000 in FY19) for the sanitary sewer system.
 - A sanitary sewer extension on West Green Street between South Busey Avenue and South McCullough Street is proposed for FY19 in conjunction with the MCORE Project on Green

- Street (www.mcoreproject.com). The properties along this section of West Green Street are served by privately owned sanitary sewers with no public sanitary sewer being located adjacent to those properties. City policy is to have a public sanitary sewer adjacent to each property eliminating private sanitary sewers that serve multiple properties.
- Sewer database expenses are budgeted as \$25,000 for FY19. The City is partnering with the Urbana Champaign Sanitary District, City of Champaign, Village of Savoy, and University of Illinois to create a computer based hydraulic model of the sanitary sewer collection system in the Champaign-Urbana area. Sanitary sewer modeling will identify areas where significant inflow and infiltration is occurring and determine where there is insufficient capacity in the City's existing sanitary sewer system. Modeling will determine the sewer capacity or the need for improvements for future developments in the City.
 - **Stormwater Utility Fee (\$1,719,918 in FY19)**
 - A city-wide Stormwater Master Plan is proposed for FY19 at an anticipated cost of \$250,000. The Stormwater Master Plan will assess the City's existing stormwater management infrastructure, establish goals and levels of service, identify problem areas, and recommend and prioritize future capital improvement projects, including green infrastructure. The last city-wide Stormwater Master Plan dates back to 1980.
 - \$223,000 is budgeted in FY19 to pay for storm sewer improvements related to the MCORE Project on Green Street (www.mcoreproject.com).
 - No storm sewer cleaning or televising is budgeted for FY19. Beginning in FY20, \$250,000 is budgeted thru FY22 for storm sewer cleaning and televising.
 - A storm sewer extension on Goose Alley west of North Race Street is proposed for FY19 in conjunction with the reconstruction of the alley's pavement.
 - The majority of expenses are for operation and maintenance activities (\$721,839 in FY19) or rehabilitation and reconstruction expenses (\$643,000 in FY19) for the storm sewer system.
 - **State Motor Fuel Tax Fund (\$1,390,000 in FY19)**
 - This fund is used primarily to fund arterial or collector street reconstruction or resurfacing or to provide the local match on federally-funded projects.
 - A combination of SMFT funds and LMFT funds were programmed to fund several of the larger resurfacing projects due to insufficient SMFT funds. An additional \$500,000 in FY19 is allocated to fund the balance of Lincoln Avenue and Springfield Avenue Resurfacing project. The additional funds are necessary to meet the American Disability Act sidewalk requirements and to provide safer bicycle/pedestrian crossings at the Lincoln Avenue/Main Street intersection as well as safer pedestrian crossings at the Lincoln Avenue/Stoughton Avenue and Lincoln Avenue/Clark Street intersections.
 - An additional \$490,000 in FY19 is allocated to fund Urbana's share of the MCORE Project (www.mcoreproject.com). The additional funds are necessary to cover additional supplemental construction engineering services in FY19 for MCORE Project 1 and additional design engineering services for MCORE Project 5 (Race Street to Busey Avenue).
 - The resurfacing of Vine Street from South of Washington Street to California Avenue is on schedule to occur in FY19.
 - The additional cost of the Lincoln Avenue and Springfield Avenue Resurfacing Project along with the additional cost of the MCORE Project have pushed back streets previously scheduled after FY19 one year.
 - Portions of streets scheduled for resurfacing using SMFT funds in the next five years include Race Street, Fairlawn Drive, and Anderson Street.
 - The resurfacing of Lincoln Avenue from South of Wascher Drive to South of Killarney Street is scheduled for FY21. The projected cost for this improvement does not include crosswalk improvements on Lincoln Avenue at One-South and One-North apartment developments near Bradley Avenue.
 - Springfield Avenue between Coler Avenue and McCullough Street is scheduled for reconstruction in FY22. The eastbound lane of Springfield Avenue is showing severe distress after being temporarily resurfaced several years ago.

- The reconstruction/rehabilitation of Florida Avenue from Busey Avenue to Vine Street is shown in FY23. It is anticipated that application will be made to fund 50% of the project using Federal Highway Funds. The local share for this project is scheduled to come from several fiscal years with the first allotment being shown in FY23.
- **Local Motor Fuel Tax Fund (\$707,694 in FY19)**
 - This fund is sometimes used to provide additional funds for the reconstruction or resurfacing of arterial or collector streets when the SMFT amount is insufficient and funds remain after first funding annual pavement preservation (i.e., oil and chip, slurry seal, microsurfacing) and pavement patching (e.g., asphalt, concrete, and brick) projects.
 - A combination of SMFT funds and LMFT funds were programmed to fund several of the larger resurfacing projects due to insufficient SMFT funds.
 - Portions of streets scheduled for resurfacing using LMFT funds in the next five years include Pennsylvania Avenue and Orchard Street.
 - Payment of the fifth of ten annual bond repayments for the reconstruction of Windsor Road from Race Street to Philo Road is shown in FY19. Bond repayment amounts for this project are projected at less than \$310,000 per year.
- **CR&I Fund (\$865,000 in FY19)**
 - Concrete sidewalk repair and replacement expenses are budgeted at \$100,000 for FY19 and brick sidewalk repairs are budgeted at \$50,000 in FY19.
 - Continuation of an annual allotment of \$55,000 for bicycle-related infrastructure maintenance (i.e., signing and pavement marking). Approximately \$235,529 has been saved in this line item, most of which will start the process of implementing a city-wide bicycle wayfinding system.
 - Three hundred fifteen thousand dollars is budgeted in FY19 for maintenance of asphalt, concrete and brick pavements. Fifty-five thousand dollars is budgeted in FY19 for engineering testing services with the balance reallocated to maintenance of asphalt, concrete and brick pavements.
 - Forty thousand dollars is budgeted in FY19 for remarking the pavement striping on city streets.
 - An allocation of \$50,000 is proposed in FY19 to be combined with the \$150,000 budgeted in FY18 to establish a city-wide pavement management system. According to the American Public Works Association, pavement management systems aid agencies by producing a systematic method in routinely collecting, storing, and retrieving the kinds of decision-making information needed to make maximum use of limited maintenance (and construction) dollars. It is anticipated that up to \$50,000 will be needed annually for the collection of street condition data by engineering consultants. The funding of a pavement management system is critical to move from a reactionary, worst-first pavement management approach to a strategic, proactive system that ensures limited pavement preservation and maintenance dollars are spent efficiently and effectively.
 - Fifteen thousand dollars is budgeted in FY19 for miscellaneous traffic studies such as intersection design studies, pedestrian mid-block crossing studies and studies to improve the safe crossing of bicyclists at various locations throughout the city.

Some project deferrals in the SMFT and LMFT funds are beyond the five-year time period. In particular, no local (residential) street work is included in the balanced SMFT projections other than some local streets which also serve as bus routes. This is due to the arterial, collector, and bus route streets receiving higher priorities based upon traffic volume and load, traffic speed, existing pavement conditions, and the limits of the projected funding. These balanced projections are not anticipated to change any time in the near future unless additional revenue is secured. Maintenance of some arterial and collector streets have been deferred up to five to ten years beyond the recommended schedule. It is probable that deferring the recommended work so long will cause the final project costs to increase due to additional deterioration. This additional increase has not been estimated and is not reflected in the cash flow.

This situation means that no SMFT funding will remain for local street maintenance under the current projections. Additional funding will be needed for arterial and collector streets if the city is to continue to maintain those in an acceptable and safe condition. LMFT funds have been allocated for some local street maintenance. In order to

accommodate some major transportation infrastructure maintenance, some projects currently projected to be funded with SMFT funds may have to be funded with CR&I funds. In order to accommodate the required cash flows to complete the necessary maintenance, there may be instances where it is necessary to borrow funds.

PUBLIC FACILITIES IMPROVEMENTS FUNDING COMMENTS

The Public Works Facilities Division is responsible for maintaining public facilities that include the City Building, Public Works Building, Storage Annex, Civic Center, Parking Deck, Landscape Recycling Center Buildings, police firing range, two fire stations, and the Marrow Building (212 West Green Street). Major capital costs associated with those facilities include:

- Roof Replacement or Repairs
- Mechanical, Electrical, and Plumbing Systems Replacement or Repairs
- Flooring Replacement
- General Facility Replacements or Repairs including doors, windows, exterior painting or tuck-pointing, security, and remodeling

Public facility operation, maintenance and improvements are funded out of the General Fund budget at a level of \$51,000 annually. Major capital improvement projects were historically funded out of the B09 Supplemental Capital Improvement Fund at a level of \$30,000 annually. Additional funds were allocated for specific projects as needed. The B09 Supplemental Capital Improvement fund was eliminated in FY17. The General Fund or Capital Replacement & Improvement Fund provides monies for City Facilities Improvements.

The deficit between public facility funding budgeted and identified capital improvement expenses is not sustainable and will result in the degradation of those facilities if not addressed in the future.

A Request for Proposals (RFP) has been released to select a consultant to provide Facilities Master Plan Services. The project goal is the development of a sound, actionable, and fiscally responsible facilities plan that supports the entire City government organization. The assessments to be performed will prioritize and identify costs for capital improvement for the city's public facilities.

An allocation of \$50,000 is proposed in FY19 for public facilities capital improvement expenses. A conditional assessment will be the first phase of the facilities study and shall provide the framework for future expense planning. This effort is anticipated to be completed in early 2019.

There are many near-term projected facilities improvement needs. Examples included below in no specific order:

- Boiler replacement at the City Building
- Building Automated Systems replacement at the City Building
- Domestic hot water heater replacement at the City Building and Public Works Facility
- HVAC retro commissioning at the City Building
- Roof replacements at the City Building, Public Works Facility, and the Civic Center
- Emergency generator installations at Fire Station #2 and #3
- Emergency generator replacement and upgrade evaluations at the City Building
- Overhead door replacements at Fire Station #1 and Storage Annex at 704 South Glover Avenue
- Security access control evaluation and installation at all facilities
- Brick façade, exterior step repairs, and railing replacement at the City Building
- Exterior tuck point and paint at Fire Station #3
- Exterior window and door replacements at Fire Station #2 and #3
- Security fencing installation and repair at Public Works facility
- Flooring replacement at all facilities
- General remodeling efforts to improve work conditions and operational needs at all facilities

These needs are expected to cost in excess of two million dollars.

2018 CAPITAL IMPROVEMENT PLAN PROJECT COMMENTS

The following is a discussion of major projects, decisions, and assumptions for projects included in the 2018 CIP. It should be noted that engineering design will be performed in-house for as many projects as practicable. Outside engineering services can add 20% to 35% more cost to projects. Existing street conditions were reviewed in the field and re-rated in 2017. Project prioritization was adjusted accordingly, as necessary.

Figure C, page 29, shows major work projected over the next five years. Some of the work shown will be performed by in-house forces from the Public Works Operations Division. This work and other preventive maintenance work not shown on this map are critical to the city's pavement maintenance program.

- Projected costs have been revised to reflect current bid prices. Projects have been deferred as necessary to maintain a positive cash flow. Projected costs and revenues are shown in 2018 dollars.
- The MVPS fund is projected to fund parking lot maintenance in 2019. Projected lots and proposed work are shown on Figure J, page 36. The MVPS fund is also projected to pay local costs for the re-lamping of some of the downtown parking lots. Replacement of series lighting on Nevada Street and Mathews Avenue in the amount of \$950,000 is unfunded. This system continues to be unreliable with outages sometimes lasting one week or more and time-consuming as considerable hours are spent making repairs.
- Substantial infrastructure improvement projects have been paid for by all three TIF districts over the last several years. Funds have been borrowed to implement the Boneyard Beautification, Race Street Bridge and Streetscape, and Broadway Avenue Streetscape projects, which were completed in December 2014.

POTENTIAL PROJECTS NOT INCLUDED IN THE RECOMMENDED PROJECT LIST

There are many other major projects not included in the cash flows. There are oil and chip streets without curbs and gutters that are not included for improvement in the next five years plus other multi-million dollar projects as listed below. Some of these projects may increase in priority in the future and, if funding levels remain flat as projected, will necessitate deferral of additional projects currently included in the 2018 cash flow projections.

• Resurfacing of Arterial Streets (Florida, Vine, Philo, Windsor) in Fair Condition	\$5,200,000
• Reconstruction of Lincoln Avenue north and south of Somer Drive in Fair Condition	\$600,000
• Resurfacing of Collector Streets (Anderson, Anthony, Bradley, Colorado, Illinois, Kenyon, Kerr, Killarney, Perkins, Smith, Wright) in Fair Condition	\$6,000,000
• Resurfacing of Collector Streets (Anderson, Goodwin, Vine) in Poor Condition	\$1,700,000
• Reconstruction of Collector Streets (Myra Ridge, Illinois, Willow) in Poor Condition	\$1,600,000
• Washington Street Improvement from Dodson Drive to Pfeffer Road	\$2,800,000
• East Florida Avenue extension	\$4,000,000
• Installation of street lighting on unlit arterial/collector streets (East University Avenue, South Vine Street, & East Florida Avenue)	\$2,000,000
• Residential intersection street lighting – approximately 210 intersections	\$4,000,000
• Airport Road extension from Willow Road to Lincoln Avenue	\$5,400,000
• Mathews Avenue and Nevada Street Crosswalk Improvements	\$125,000
• Lincoln Avenue Corridor Safety Improvements (Pennsylvania Avenue to Nevada Street)	\$800,000
• Lincoln Avenue Crosswalk Improvements (One-South and One-North Developments near Bradley Avenue)	no estimate available
• KRT-Weaver Park Crosswalk Improvements on East Main Street	no estimate available

• University Avenue Multi-use Path Crosswalk Improvements (near Ambucs Park)	no estimate available
• Olympian Drive from Lincoln Avenue to U. S. Route 45	\$12,000,000
• Boundary area storm sewers	no estimate available
• Lierman Neighborhood Street Lighting	no estimate available
• Hill Street from Harvey Street to Lincoln Avenue Sidewalk	\$50,000
• Lincoln Avenue pedestrian crossing between Sunset Drive and Bradley Avenue	\$40,000
• Boneyard Creek Improvements Projects (Segments 1, 2, 4, and 5)	\$6,000,000
• Broadway Avenue, Thompson Street to Country Club Road; and Country Club Road, Broadway Avenue to E of Division Avenue (Urbana Township) Multi-use Path	no estimate available
• Nevada Street and Mathews Avenue Streetlight Modernization	\$950,000

Clearly, the funding level for pavement maintenance must increase to address the tremendous need and backlog. Identification of such funding sources and grants is necessary. The state motor fuel tax has not been increased since 1991 and Urbana's state revenues, despite a modest population increase, have remained flat. Municipalities across Illinois are feeling this impact. Nationally the American Society of Civil Engineers gives a grade of D for our roadways. In Urbana, a grade like this is unacceptable.

BACKGROUND/FACTS

The purpose, goals and objectives of the Capital Improvement Plan remain the same as outlined in the first plan, i.e. consistent, coordinated and realistic long-range planning is essential for maintaining existing facilities and continuing to provide a high-level of infrastructure in support of the local economy and environment. The Capital Improvement Plan provides a comprehensive infrastructure assessment so that better decisions can be made to efficiently and effectively use construction and maintenance dollars.

Each proposed project has been reviewed and evaluated regarding all other potential infrastructure needs on that street section with street improvements and maintenance being lead projects in many cases. This comprehensive analysis is used to coordinate projects in an efficient, cost-effective manner and to minimize construction inconveniences to residents in the project area.

OPTIONS AND THEIR CONSEQUENCES

The Capital Improvement Plan articulates long-range plans of the city. This is a product of coordination of the city's goals, objectives and resources. Approval of the revised Capital Improvement Plan is important for the vitality of the City of Urbana. Economic efficiency is realized and construction inconveniences are minimized through capital improvement planning. The Capital Improvement Plan allocates projected financial resources to carry out capital improvements based on overall priorities and priorities within specific infrastructure elements.

RECOMMENDATIONS

It is recommended that a resolution be adopted approving the revised Capital Improvement Plan for this year. A draft of the resolution is attached. This information will be utilized in the budgeting process for capital improvements through the special fund budget sections.

RESOLUTION NO. 8788-R14

A RESOLUTION APPROVING
THE CAPITAL IMPROVEMENT PLAN FOR
THE CITY OF URBANA

WHEREAS, the capital infrastructure is important for the vitality of the City of Urbana and the health, safety and comfort of its citizens; and

WHEREAS, financial resources are limited and it is essential to establish priorities for capital improvements to spend monies effectively and efficiently; and

WHEREAS, economic efficiency is realized and construction inconveniences are minimized through capital improvement planning; and

WHEREAS, the support and understanding of the information concerning capital improvement planning is vital for an informed citizenry; and

WHEREAS, Resolution No. 8182-R32 requires that a Capital Improvement Plan be established for the City of Urbana; and

WHEREAS, development of a Capital Improvement Plan was identified as one of the top three priorities of the City Council at a goal-setting session in July 1986;

NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF URBAN, ILLINOIS, as follows:

1. The Capital Improvement Plan for the City of Urbana, dated July, 1986, prepared by the City staff, be and the same is hereby approved by the City Council.

2. Option 3A as amended, along with a program to be developed for the repair and maintenance of brick streets and sidewalks shall serve as a Master Plan for coordinating and prioritizing capital improvements so identified in such Capital Improvement Plan in and for the City of Urbana and to aid review of subdivisions and developments.

3. That this plan shall be updated annually to reflect new needs and project priorities.

4. That the following concepts are incorporated into the Capital Improvement Plan relating to methods of financing the various improvements in the plan:

A. All City funds will be utilized to carry out street, sidewalk and lighting projects on arterial and collector streets ("City funds" as used herein shall include CIRF, MFT, FAU, CDBG, etc., and funds obtained from private sources; i.e., annexation and development agreements).

B. All City funds will be utilized for projects involving the maintenance, reconstruction and replacement of existing streets, sidewalks and lighting systems; included are brick streets and brick sidewalks.

C. Projects involving new or significantly upgraded residential street, sidewalk and lighting projects (except CDBG projects), will be subject to a policy to be adopted by the City Council.

D. Sewer Benefit Tax funds will be utilized for improvements to the public sewage system, with property owners responsible for the construction cost and maintenance of service lines from the mains.

E. All City funds will be utilized for improvements to storm sewers and detention facilities that are part of the public drainage system, with property owners responsible for the construction cost and maintenance of service lines from the mains.

F. All City funds will be utilized for new construction and replacement of traffic signals.

G. All projects are dependent upon the availability of funds from the respective funding source, including the Capital Improvement and Replacement Fund.

5. That implementation of the Plan shall be through normal budgeting processes or through other means acceptable to the City Council.

PASSED by the City Council this 18th day of April, 1988.

Ruth S. Brookens, _____ (signed)
Ruth S. Brookens, City Clerk

APPROVED by the Mayor this 25th day of April, 1988.

Jeffrey T. Markland, _____ (signed)
Jeffrey T. Markland, Mayor

RESOLUTION NO. 2018-05-022R

A RESOLUTION APPROVING THE CAPITAL IMPROVEMENT PLAN

(2018)

WHEREAS, on April 18, 1988, the City Council authorized a capital improvement plan for the City of Urbana, pursuant to Resolution No. 8788-R14; and

WHEREAS, said Resolution requires the City Council to update such plan annually to reflect new and changing needs and project priorities.

NOW, THEREFORE, BE IT RESOLVED by the City Council, of the City of Urbana, Illinois, as follows:

The 2018 Capital Improvement Plan, in substantially the form of the copy of said Plan attached hereto and hereby incorporated by reference, be and the same is hereby authorized and approved.

PASSED BY THE CITY COUNCIL this _____ day of _____, _____.

Charles A. Smyth, City Clerk

APPROVED BY THE MAYOR this _____ day of _____, _____.

Diane Wolfe Marlin, Mayor
